The culture and preparation of tea

In Eastern Africa, tea is grown in the equatorial area in Kenya, Uganda, northern Tanganyika and the Belgian Congo. It is grown in the Nyasa tea belt, further south, which includes southern Tanganyika, south Nyasaland and the adjacent area in Portuguese East Africa. Tea is grown in the eastern area of Southern Rhodesia. A start has been made in the Cameroons in West Africa.

Tea can be grown in the southern states of the U.S.A. and from 1890 to 1915 an experimental station was worked in South Carolina. The tea grew well but labor costs made it an uneconomic crop. Tea is grown in Mexico and Guatemala, in Central America. It is grown in Colombia, Bolivia and Peru, and in the last country 2,600 acres are in production. Well over a century ago, tea was grown near St. Sebastian in Brazil and now, near Santos, over 5,000 acres are planted producing 1½ million lb. tea much of which is exported. In the Argentina, in the Corrientes and Misiones territories nearly 8,000 acres are put out, producing 2½ million lb. tea at present.

Country	Up to the Month	Year – 2026	Year – 2025	Up to Month (+/-)
Bangladesh	July	42.74	36.0	6.74
